

2.0mm Micro Fanout Cable MTP®/CS®/MDC®/LCDX

2mm Micro Fanout Assemblies by Cablcon are a new line of *Cutting EDGE* solutions aimed at optimizing density and minimizing your cable footprint while connecting between equipment and the patch panel. Available from 24-144 fibers, each highly flexible 2mm subunit is comprised of twelve 250um fibers and an aramid strength member. Based on your needs, each 2mm subunit can then be independently terminated with an MTP® Pro Elite, or broken out into LCDX, CS® or MDC® connectors with two-fiber 1.6mm legs. 2mm Micro Fanout Assemblies can more than double the space in your cable tray when compared to traditional 3mm breakout solutions, while also minimizing the clutter at the patch panel.

Cablcon fiber optic assemblies are American-made at one of our ISO 9001 and TL 9000-certified facilities. Our products meet or exceed GR-326/GR-1435 as well as the IEC standard for end-face cleanliness. We specialize in quick-turn, custom length manufacturing.

APPLICATIONS

- Data Centers/Central Offices/C-RAN iEN Hubs
- Direct interface or interconnect between fiber management panels and equipment using a variety of small form connectors; MTP®, CS®, MDC® and LC.
- In-building runs where space is at a premium
- Horizontal & riser trunk applications where flexibility and tight bend radius are required

FEATURES

- Small O.D. (24F & 48F) 7.0mm, (72F) 8.2mm, (144F) 10.3mm
- Smaller design facilitates increased airflow improving heat dissipation
- Singlemode OS2 (G657.A1) and Multimode Laser Optimized OM4 plenum-rated cable with Corning® glass
- Qualified industry leading components to GR-409, GR-1435 and GR-326
- Pro series MTP® and MDC® includes push/pull boot for easier insertion and extraction
- CS® includes push/pull tab in various lengths aiding in insertion and extraction
- LCDX available in uniboot as well as push/pull tab in various lengths
- Custom build configurations
